

Care homes: Advice after your Covid-19 vaccine

It takes a few weeks for your body to build up protection from the vaccine which will reduce your chance of getting COVID19 or getting seriously ill from the infection.

We don't yet know whether it will stop you from passing the virus to others, but we expect it will reduce the risk.

This means, after your vaccine you should carry on protecting yourself, residents and those around you by:

Two metre social distancing

Wearing PPE and face masks

Cleaning your hands regularly
and thoroughly

Follow the guidance and rules
in your local area
